

Premier-Op20

Fully Finsihed Up & Over
Garage Door

Op20 Single Skin One Piece Doors

The Op20 One Piece Single Skin garage door incorporates many exciting benefits over standard one Piece doors. Standard colour is fully finished white with several colour options available. Every door comes complete with galvanised fully finished white slim line maintenance free frame and specialised cantilever operation eliminating cumbersome internal tracks.

Security Fixings in a double line formation attach the door section firmly to the chassis

Side Shields eradicate finger trap and creating a much improved seal on each side

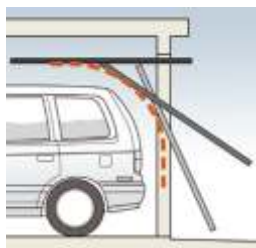

Reinforced glass plastic frame corners removing the need for welding, eliminating rusting corners.

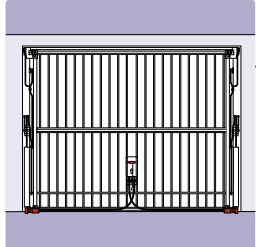

Intergrated tracks allow the door to open fully into the garage without the need for internal tracking

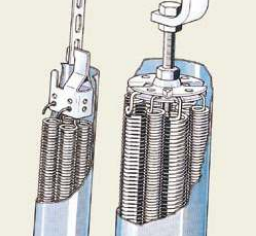

Spring covers keep the spring unit concealed at all times.

The specially designed cantilivers system gives additional height inside the garage due to the higher radius during operation.

Multi-point base locking which is integral to the door frame, adding extra security.

No Cables, the door has multi spring counterbalance which is attached directly requiring less maintenance.

Automation Kit

Op20 doors can be upgraded to remote control operation by adding a simple to install automation kit.

Options

High security digital entry keypad allowing secure keyless entry via a four digit code.

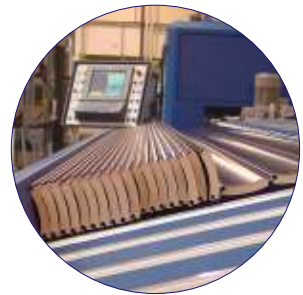

Integrated battery back up pack, giving power operation even during a mains failure

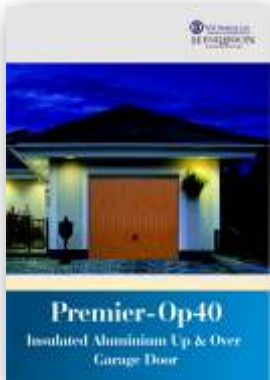

Specially designed handsets allowing integration of other powered products such as external lights and gates.

Hundreds of doors now in stock for rapid delivery throughout the UK via our dedicated transport system
